PATCH DETAILS

Patch Name : **AdeptiaSuite_6_2_SP2_02_15Dec_2015.zip**

Build Tag : **Release_6_2_SP2_02_10Dec2015**

APPLIES TO

This is the cumulative patch and can only be applied on Adeptia Suite Version 6.2 SP2 Release with any of the following Build Tags:

- **Release_6_2_SP2_01Oct2015**
- **Release_6_2_SP2_01_05Nov2015**

RELEASE_6_2_SP2_02_10DEC2015

What's new in this update?

1. Support for JSON Schema

Support is added for JSON Schema to process the json files.

For detailed description refer

<https://docs.adeptia.com/display/AS/Creating+JSON+Schema+Activity>

2. Support is added for configurable option to generate unique target file in B2B

In EDI Inbound and Outbound relationship a new field "Create Unique File" is added to append a unique number at the end of target file name. By default this field value is set as unchecked for new activities.

([Ticket #6638](#))

For detailed description refer

<https://docs.adeptia.com/display/AS/Creating+Inbound+Relationship+for+EDI+Data>

<https://docs.adeptia.com/display/AS/Creating+Outbound+Relationship+for+EDI+Data>

Bug Fixes

1. In EDI Outbound, when Skip compliance is unchecked and there is some error in EDI file generation then in B2B logs status is displayed as error but in View Data window error is not displayed. ([Ticket #6735](#))

2. When you edit EDI Inbound relationship created with 277 HIPAA Data Dictionary then “EDI Standard version” and “Transaction Set Code” fields are not displayed as selected. ([Ticket #6635](#))

RELEASE_6_2_SP2_01_05NOV2015

What's new in this update?

1. Support is added to Migrate Project objects in GUI mode

Support is added in Migration Utility for Project export, import and promote in GUI mode.

For detailed description refer

<https://confluence.adeptia.com/display/AS/Export>

2. Support is added to use context variable in E-mail body of Human Workflow Task

Support is added to use context variable in E-mail body of Human Workflow task. ([Ticket #6483](#))

For detailed description refer

<https://confluence.adeptia.com/display/AS/Creating+Human+WorkFlow+Task>

3. Support is added to display the Detail log page in AS2 log page

Support is added to display the detailed logs for AS2 log page.

For detailed description refer

<https://confluence.adeptia.com/display/AS/Viewing+AS2+Logs>

Bug Fixes

1. When you retain AU_ACTIVEFLAG field of Process flow through silent migration then this field does not retain after objects deployment. ([Ticket #6555](#))
2. When you create the Database Event with MS-Access database and SQL Query is of more than 3000 characters then event activity does not save. ([Ticket #6556](#))
3. When you execute the Advanced Database schema created with MS-Access database using JDBC-ODBC bridge driver then “No Data found” error is displayed. ([Ticket #6556](#))
4. When you create Advanced Database schema with MS-Access database, the Browse Table button is not working. ([Ticket #6556](#))
5. When you edit EDI Inbound relationship created with 277 HIPAA Data Dictionary then “EDI Standard version” and “Transaction Set Code” fields are not displayed as selected. ([Ticket #6635](#))
